Our Partnership Strategy

QB Networks

We follow a business model that supports every organization and user in the digital society to make everyone a potential author.

We help them to be ready for real world platforms.

Fork

To have a copy

Maintain

To make it available for everyone

Contribute

When needed with code, money,
technical experience.

R&D

To make it better.

Test

To provide a stable product

Lead

To lead means to carry the responsibility
of Free Software and Open Source
movements

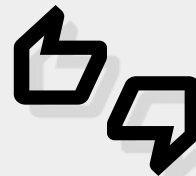

01 Fork

Fork is not the end. Don't afraid to click the "button"

02 Contribute

Ask questions. Don't be shy.

03 Lead

Make your own changes. And distribute your own modified code. And sell it when you need. This is your freedom.

0

Fork

1 The step is to think why we need a software. Or any information.

0

R&D

3 Research and Development...
Way to understand and re-think.

Contribute

0

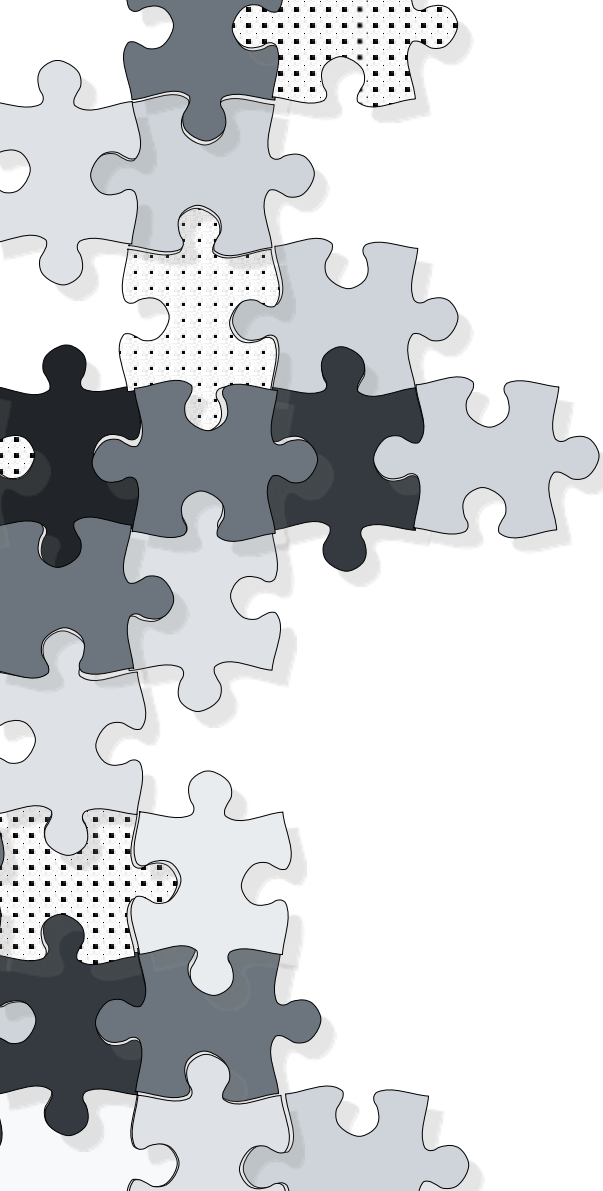

2 Provide a service within your own community for everyone. Collaborate together ... This is the key to the common success...

0

Lead

4

Lead , Explore, Challenge and then become a master.

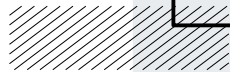

“

For free software we need
independence. For
independency we need actions.
For actions we help each other.
This way we are together free.

”

- Mert Gör QB Networks

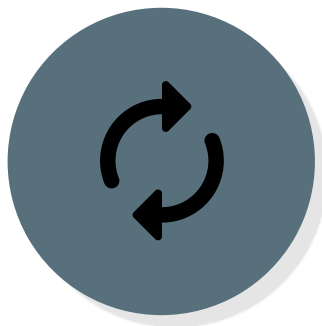

Lorem & Ipsum

Idea

Be aware of your existence.
Read books, listen music,
watch movies. Take parts
from real life.

Socialize

Be social, write social
code.

Lead

Lead & Carry on

Q&A

Mert Gör, Founder of **QB Networks** Cyber Security Company which serves 24/7/365 to the public , my e-mail is mertgor@qbnetworks.xyz and my GPG Key ID is **0xD200B456637BC4F3**
