PSD

The Next Generation GNU/Linux

Comparing PSD with others

- PSD has a whole centralized repository database
- PSD is open to contributions
- PSD is a community effort
- PSD cares about technical freedom and perfectionism

Comparing PSD with others

- It is not hard for us to help others

- By helping others we also help us

- Our philosophy is "showing humanity to others"

Comparing PSD with others

- Though we left BSD-style organization, still we have a leadership which is called also "the core team" but this role depends on how a programmer work independently in a decentralized global network freely.

- If a programmer works 24/7/365 then the programmer is accepted to the core team for the related organization.
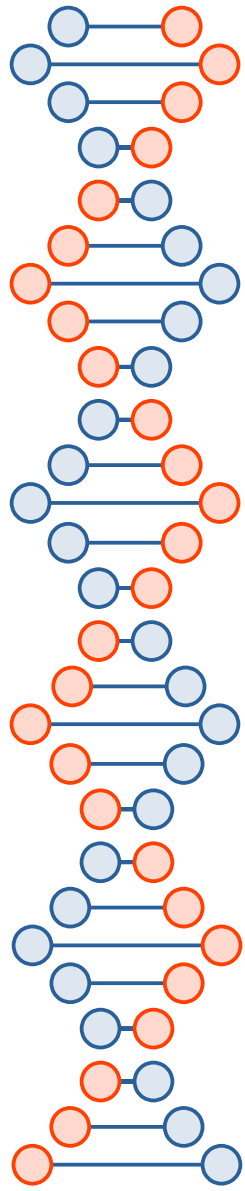

Our influences for PSD naming

- Proactive Cyberian Systems Distribution (most of IT companies)

- Profound Cyberian Systems Distribution (martial arts)
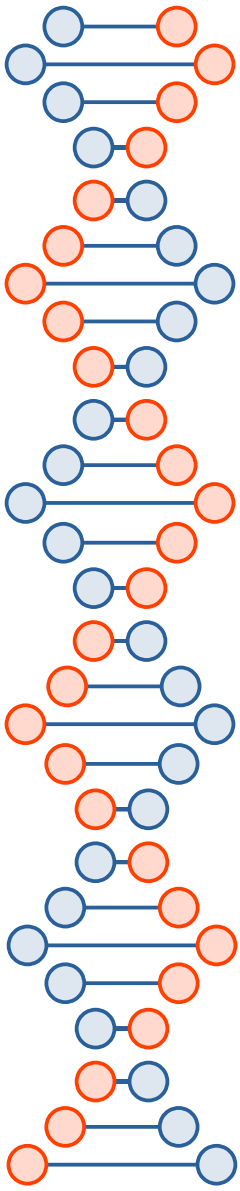

PSD logo and motto
